

## HAIR ANALYSIS PRIOR TO THE RE-KOLOUR SERVICE

1. **How long is the hair?**  Centimetres (cms)

2. **How old is the hair?**  (1cm = 1 month) Months

3. **History of the Hair:**

(a) What colouring services have been carried out on the hair over the last x (answer 2) months? Including bleaches, colour corrections etc.

(b) In the last X months if any what perming/ relaxing or keratin treatments have been carried out on the hair?

(c) Has the hair in X months had any henna?

<b>YES</b>	<input type="text"/>
<b>NO</b>	<input type="text"/>

4: **Condition of the Hair:** What is the texture of the hair?

<b>FINE</b>	<input type="text"/>	<b>MEDIUM</b>	<input type="text"/>	<b>COARSE</b>	<input type="text"/>
-------------	----------------------	---------------	----------------------	---------------	----------------------

(d) How does the hair feel? Good condition – sensitised or very sensitised.

HAIR	GOOD CONDITION	SENSITISED	VERY SENSITISED
ROOTS	<input type="text"/>	<input type="text"/>	<input type="text"/>
MID-LENGTHS	<input type="text"/>	<input type="text"/>	<input type="text"/>
ENDS	<input type="text"/>	<input type="text"/>	<input type="text"/>

(e) What does the hair feel like when it is washed – does it tangle when wet before conditioner?

<b>YES</b>	<input type="text"/>	<b>NO</b>	<input type="text"/>
------------	----------------------	-----------	----------------------

**REMEMBER: HISTORY OF THE HAIR + CONDITION = REDUCED DEVELOPMENT TIME**

# PeRA | 357®

## **History of The Hair:**

\* Any **High Lift Tint** or **Bleach** = **Reduces development time.**

(Check the hair with an **elasticity test every 5-10 minutes**). A maximum time of up to 20 minutes, if the elasticity strength is good.

\* Any **perming /relaxing/keratin on the hair** = **Reduces Development Time** by up to half. (Check the hair with an **elasticity test every 5-10 minutes**).

## **Condition:**

\* **Fine hair = Reduces Development Time** - (Check the hair with an **elasticity test every 5 - 10 minutes**).

\* **Sensitivity = Reduces Development Times** - (Check the hair with an **elasticity test every 5 - 10 minutes**).

\* **Very Sensitised Hair** (over-processed hair) is **not** suitable for Re-Kolour.

## **Application:**

Re-Kolour may require different development times

- depending on the amount of colour to be removed (History of the Hair)
- the hair texture and sensitivity (Hair Condition).

Always start at the darkest, strongest hair first – then apply to the other areas for their appropriate development times so as not to over process any hair.

If in doubt do a strand test prior to the service and perform an elasticity test every 5-10 minutes.

**Before you start:** Using the previous consultation information about the hair history and condition, fill in the chart below to help decide the order of your application.

<b>Different History of the Hair to Consider</b>	<b>Condition of these Areas</b>	<b>Maximum Development Time for These Areas</b>	<b>List Starting Point 1 to 5 (as necessary)</b>
